# Titan - The Edge

**Create the slimmest watch in the world**

**The Swiss had attempted it in 1982 - and failed**

**Not workable - and not water resistant**

**A watch can either be slim **or** water resistant.**

**It cannot be both!!**

**The extreme challenge: **We will create the slimmest, water resistant watch in the world****

## Some of the Innovations

**Drastically slim movements  
not developed before**

**Slimmer batteries with  
double the battery back  
up.**

**75% slimmer glass,  
with all the features  
of the previously  
used glass**

**Slimness of only 3.5mm - as thin as the edge of only 1 floppy disc**

**Certified as water resistant up to 30 meters**

**The EDGE movement has been granted patents and has sold over 500,000 pieces till 2007**

**A global benchmark and is unique to the world**
